

$$H_i^\pm = \{X: \mathbf{d}_i^\pm \times (X - \mathbf{p}_i) \geq 0\}$$

两条边界均按箭头左侧取可行半平面

$\mathbf{d}_i^+$

$X \in H_i^- \cap H_i^+$

$H_i^- \cap H_i^+$
统一的可行区域（左侧）

$\mathbf{d}_i^+ = -\mathbf{u}_i^+$

$\mathbf{p}_i = M_i$

$\mathbf{d}_i^- = \mathbf{u}_i^-$
